

Bulk Material Transport and Handling Systems
Prof. Khanindra Pathak
Department of Mining Engineering
Indian Institute of Technology, Kharagpur

Lecture - 39
Off-Highway Trucks and Haul Roads (1)

Welcome back. So, we have completed so far line modules of this bulk material transportation and handling system. In which we have already learned the basic overview of what are the various handling operations and then what are the need of transportation of bulk material. And you know that the bulk material handling and transportations can give a use when you study this particular subject.

You should develop your expertise and competency in transportation and logistics which is a very upcoming areas and there could be lot of business in near future where you can develop your business or you can get your opportunity to serve this transportation and logistics sector in different industries. As bulk material is mostly involved in the mining industry and in our country which having more than more than and 250 coal mines.

And there are about more than 2000 small quarries speeds and then places you can imagine that how much this bulk material handling and transportation areas and jobs existing. Now for that we will be discussing today.
